

Create affiliate links with the click of a button

The Trackonomics Publisher Extension enables dynamic link creation with the touch of a button.

Available on Google Chrome, this extension collects and stores offers from all of the affiliate networks connected to your Trackonomics dashboard. Search available merchant products to find the best commission rates across multiple networks and generate affiliate links in seconds.

When you streamline and automate your link creation process, you can spend more time producing engaging content that keeps your audience coming back for more.

What limits your commerce content scalability?

Arduous link creation processes

The time-consuming process of manually searching for products and generating affiliate links hinders productivity and increases the chances of tracking errors.

Missed revenue for high-commission products

You have to log into multiple affiliate networks to find the best commission rates, making it easier to overlook valuable opportunities, leaving revenue on the table.

Streamline and enhance affiliate link creation

Optimize links to maximize earnings

Find products from the brands that pay the highest commissions and research products in-app to generate the best results from any content you produce.

Create all your links in one place

In addition to using our chrome extension to easily generate links on the fly, publishers have the flexibility to use our product linking API to automatically create affiliate links from within your CMS.

Increase productivity by 160 percent

Use your time for the things that matter. Trackonomics customers report a productivity boost of 160 percent from link automation tools alone.

Ready to take your affiliate program to the next level with Trackonomics? The Trackonomics Publisher Extension is the only affiliate tool on the market for publishers that dynamically creates links across affiliate programs and networks with the touch of a button.
